

Bridge Shelter Success: Sara's story

Sara is a recent Bridge Shelter client. Currently employed as a Certified Nursing Assistant in north Orange County, she found herself living on the streets and in various motels due to chronic illness and the inability to obtain a consistent and affordable housing situation.

Sara entered the Costa Mesa bridge shelter several weeks ago and was provided a safe place to sleep, new clothes, the opportunity to work with a case manager on a housing plan and access to consistent transportation to her job.

We are excited to share that just this week Sara was able to secure and enter into a shared living situation/room rental and has plans to continue her stabilized housing situation.

Stories like Sara's are impactful and life-changing and we look forward to sharing more stories of success with the community.
