

Construction to take place on Bristol Street beginning tonight Feb. 16

As part of the on-going Bristol Street Improvement Project, Sully-Miller Contracting Co. will begin grinding existing deteriorating pavement on Bristol Street, between Baker Street and Randolph Avenue, on Friday, Feb. 16 beginning at 8 p.m.

On Saturday, Feb. 17, from 6 a.m. to early afternoon, Sully-Miller will be installing new pavement on Bristol Street, between Baker Street and Randolph Avenue. Adjacent businesses have been notified of this scheduled work and access to them will be maintained.

Please expect intermittent delays during the construction. The median curbs on Bristol Street between Baker Street and Newport Boulevard will be completed in the next two weeks and the landscaping by the end of March 2018.

The improvement project includes roadway resurfacing, new storm drain catch basins, new landscaped medians, new traffic signal installation and a storm water diversion project.

This project represents more than \$6.5 million in improvements with funding coming from various sources including Federal, State and County agencies, gas tax and local funds.

This project will provide a smoother ride along this stretch of Bristol Street, better operational conditions for vehicular and pedestrian traffic, and improve the water quality of the Back Bay area by providing treatment for some of the storm water runoff.
