

Costa Mesa to receive \$630,000 grant toward making streets safer

The U.S. Department of Transportation has awarded a \$630,000 Safe Streets and Roads for All grant to the City of Costa Mesa to develop a Safe Routes to School Action Plan.

The grant will provide the City with funds to develop a comprehensive safety action plan with specific implementable project concepts to enhance safety on streets used to access each of the Newport-Mesa Unified School District campuses located within the City.

Costa Mesa is one of seven jurisdictions to receive this federal grant funding in Orange County, and will receive nearly 25% of the total funding allocated to the county.

“The City of Costa Mesa is excited to receive this grant award from the USDOT for safer walking and biking to school and encourage healthy and active transportation options for students in our community” said Mayor John Stephens. “As the popularity of walking and biking increases in Costa Mesa, we look for opportunities to improve safety and mobility for vulnerable roadway users including school aged children.”

Fifth District Council Member Arlis Reynolds, who has led the way on advocating for safe street programs for Costa Mesa, was also happy to see the City get this funding.

“That we won one of the largest grant in Orange County signifies our focus and leadership on street safety for our community,” she said. “This grant is a huge win for our community, especially our students and their families, and sets us up for significant safety improvements on walking and biking routes to school.”

The Bipartisan Infrastructure Law established the new Safe Streets discretionary program with \$5 billion in appropriated funds over the next five years.

This first funding cycle of the grant program, announced on Feb. 1, 2023, will award \$800 million to 510 communities across the United States.

The program focuses on implementing low-cost roadway safety treatments and action plans to increase the safety of all roadway users.
