

Fire Station No. 1 construction reaches new milestone

Public Services recently reached another major milestone with the reconstruction of Fire Station No. 1.

The new LEED Gold station is in the final stages of construction with the installation of architectural finishes and permanent power being supplied to the building. Southern California Edison (SCE) is onsite delivering the new electrical transformer and installing cables and wiring to provide electrical service to the building.

This major milestone will provide the utility necessary to begin the early stages of mechanical, electrical, and plumbing testing, preparations for energizing these systems, ensuring proper system functionality, and conformance with energy standards to meet LEED Gold certification.
