

Point in Time Count shows Costa Mesa's homeless population dipped to 103

The results of the Point in Time survey of homeless by the nonprofit service organization 211oc indicates Costa Mesa's homeless population has dropped to 103 individuals, a decrease from the last count by Vanguard University in February of 2016 that counted 158 homeless on Costa Mesa's streets.

That Vanguard study was reported on [here](#).

As always, there are many factors that have helped with this positive change. A key factor for Costa Mesa is the City's Network for Homeless Solutions, which since 2013 has helped house nearly 300 people who were previously homeless.

The Network for Homeless Solutions is a collaborative effort among city outreach workers, code enforcement, police and park rangers, community churches, and non-profit and private organizations to address homelessness in Costa Mesa. The network works daily to assist homeless and educates community members and businesses on how to best manage the issues that arise from homeless populations.

Additionally, a recent survey by the County of Orange found that of the 422 individuals living in the homeless encampment along the Santa Ana River near Angels Stadium, only five of them or 1.6 percent stated Costa Mesa was the last place they called home. This demonstrates that Costa Mesa's homeless is not necessarily contributing to the larger countywide problem.

The Point in Time count of homeless individuals in the county was conducted by the nonprofit service organization 211oc and began on the night of Jan. 27, 2017 and continued until the next morning. There was a 40% increase in volunteers helping

211oc to conduct the count (1,184 people), which represents a 47% increase in the number of mapped areas covered, making this the most comprehensive and detailed count ever completed.

Costa Mesa, with a population of 113,000, represents approximately 3.6% of the total population in the county. That 3.6% number is reflective of nearly the same ratio of the city's homeless population in the entire county, which is at 4%.

This brief report provides information for Costa Mesa on the estimated number of people who were experiencing unsheltered homelessness within the city on the morning of the 2017 Point-In-Time Count.

The estimates were derived using the total unsheltered PIT count as well as census data indicating the 2016 estimated poverty population of the city (see Appendix for a discussion of the data and assumptions used). In addition to the total number of people experiencing homelessness who were unsheltered, the table below provides additional estimates of that population in terms of age, gender, ethnicity, and race.

As the table below indicates, three people in families experiencing unsheltered homelessness and 100 unsheltered individuals (a total of 4% of the all people experiencing unsheltered homelessness in the County of 2,584 individuals) are estimated to have been in Costa Mesa. Single adults were primarily: over 24 years old, male, and Caucasian. The family household had two adults over 24 years old and one child under 18 years old.

The Table below illustrates both family and adult only households

City	Pop	Pov Rate	Est #people unshel	Est % people unsheltered
Costa Mesa	113204	14.5%	103	4%
County	3,172,532	13.0%	2,584	100%

The Point in Time count is mandated by Housing and Urban Development (HUD) to be conducted at least every two years, and includes counting those sleeping in both sheltered (emergency shelter and transitional housing) and unsheltered locations.

Orange County, and the cities within Orange County, were further interested in the geographic distribution of the people experiencing homelessness. Because the location of shelters varies throughout the County, the only information that is useful to report at a city level is people experiencing unsheltered homelessness. The full PIT report can be found at <http://www.211oc.org/>.
